DETAILED ACTION

Allowable Subject Matter

1. An "Amendment" was received on April 5, 2006, in response to Office Action of December 5, 2005. Independent claim 1 has been amended, as indicated.

Subsequently, another "Supplemental Amendment" was received on April 25, 2006. The drawings and specification have been amended, as indicated.

2. Claims 1-17 are allowed.

3. The following is an examiner's statement of reasons for allowance:

4. With respect to amended independent claim 1, prior art fails to disclose a particle beam generator, comprising an extracting plate, having an extracting aperture, disposed adjacent a particle source and operable to extract particles from such a source into the extracting aperture to form a particle beam, particle accelerating means operable to accelerate the extracted particles to increase the energy of the beam, and collimating means operable to collimate the particle beam, characterized in that the extracting plate is disposed sufficiently close to the particle source such that this proximity in combination with the provision of an electric field applied to either side of the extracting aperture to provide a focusing effect on the particle beam passing through the extracting aperture, together inhibit lateral expansion of said particle beam such that it has a diameter of less than 100 nm.

Claims 2-17 are allowed by virtue of their dependencies on the independent claim 1.

Conclusion

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments of Statement of Reasons for Allowance".
